Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claims 1-4 are rejected under 35 U.S.C. § 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 1, line 9 and lines 11-12, "the end behind it" lacks proper antecedent basis and is not clearly understood.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1,2 and 4 are rejected under 35 U.S.C. § 102(b) as being clearly anticipated by U.S. patent 2,053,807 to Wadsworth. The Wadsworth device is directed to a protective pipe coupling with body 1 with preformed tapered threads and includes an integral extension thread protective collar which holds a sealing compound 5 which acts to protect the unused threads of the pipe 4.

Claims 1 and 4 are rejected under 35 U.S.C. § 102(b) as being clearly anticipated by U.S. patent 437,019 to Clemens. The Clemens device is directed to a protective pipe coupling with elbow body "D" with preformed threads and includes an integral extension thread protective collar which holds a sealing compound "C" which acts to protect the unused threads of the pipe "A".

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. patent 616,011 to Reich in view of U.S. patent 4,730,855 to Pelletier. Reich

discloses the claimed invention except with elbow body with preformed threads and includes an integral extension thread protective collar "f" which holds a sealing compound which acts to protect the unused threads of the pipe "a" however the elbow fitting is not stated to be made of galvanized iron material. Pelletier teaches that it is old and well known to fabricate pipe elbows from galvanized material. It would have been obvious to one having ordinary skill in the art at the time the invention was made to construct the elbow of Reich from galvanized material as taught by Pelletier, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. *In re Leshin*, 125 USPQ 416.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
